TIROLER GOLDSCHMIED

## From one-man venture to prestigious designer studio

In the course of its more than 50-year history TIROLER GOLDSCHMIED has firmly established itself in the jewelry industry. The rise of the renowned family business from its early beginnings as a one-man venture to an internationally acclaimed and multiple-award-winning top jewelry enterprise ranks among the great success stories in the South Tyrol.

In 1969 Eusebius Gamper founded the company in Merano. Two years later he relocated to Dorf Tirol where he steadily grew his business, supported by his wife Margareth. Sophisticated jewelry pieces in masterful elaboration became his specialty and trademark.

Four distinctive collections are at the heart of the assortment: the LA PREZIOSA jewelry design line, an exclusive wedding jewelry collection, the upscale “high jewelry” collection and the hunting & tradition jewelry line. Each piece of jewelry is designed, crafted and completed in the TIROLER GOLDSCHMIED in-house manufacture.

A pioneering spirit and a sense for future trends led the family to launch Italy’s very first exclusive wedding jewelry store with VIP-service in 2010. All jewelry collections are presented at the major trade shows in Salzburg, Seefeld, Dortmund, Munich and Bolzano. In fall 2010 the diamond-studded falconry hoods caused an

international sensation at the world’s largest falconry trade fair in Abu Dhabi.

The outstanding quality and the unique designs by TIROLER GOLDSCHMIED excel in global competition – the jewelry family won countless national and international awards. In Kobe, Japan, Eusebius and Hannes Gamper outperformed the all-Asian competition. In Hong Kong, China, they succeeded against 700 competitors. The company also won the Italian “Tahitian Pearl Trophy” in two categories. Thomas Gamper won the title of vice world champion in the goldsmith category in the 2009 WorldSkills Competition in Calgary, Canada.

The precious designs are displayed in the elegant atmosphere of TIROLER GOLDSCHMIED’s six branch stores in Dorf Tirol, Schenna, Merano, the Quellenhof Luxury Resort and in Rottach-Egern at Tegernsee. A range of watch brands and carefully selected pieces by renowned international jewelry manufacturers and young designers complete the product range. The manufacture’s tasteful assortment attracts clients from all over the world. The company’s structure as a family business is a crucial success factor: The passion for high-end jewelry and groundbreaking design comes naturally to the next generation as well. All four children and three of their spouses contribute to the prospering of the company with their individual skills and professional trainings as goldsmiths, jewelry designers, gemologists and diamond appraisers respectively. Thus the multi-generational team of 24 has positioned itself perfectly for a successful future.

Aesthetically pleasing, functionally designed, creative and contemporary – these terms do not only define the artful creations but also the professional and private mindset of the Gamper family.
